

### 【Sharing the best of Fukushima Prefecture】

On Saturday June 17, a delegation from Kawauchi Village in Fukushima Prefecture showcased #soba buckwheat noodle, a local specialty, with students at the Weekend Japanese School in City Beach.

The Weekend Japanese School has offered their ongoing support to those affected by the 2011 Great Eastern Japan Earthquake and Tsunami by sending donations and children's books to the communities.

The event was in collaboration with Toyota who gave a presentation on hydrogen energy, showcasing the technologies growing potential through the hydrogen-powered Mirai and FCV Kitchen Diner food van where the soba was prepared.

The group also received a message from the Governor of Fukushima Prefecture, Mr Masao Uchibori. It was an event that highlighted our countries strong bonds and the unwavering kindness of our communities.
